

"An echo that waits for you: quiet while you sing, blooming in the pauses."

A tape echo that stays quiet while you sing and blooms in the pauses.

PILLOW TALK

What does it do?

A tape echo that stays quiet while you sing and blooms in the pauses.

How does the signal run?

The voice goes to the tape. A detector listens to the same voice and pushes the echo down while you sing; when the phrase ends the repeats come back up.

When should I reach for it?

Vocals that need space without mud. A lead guitar on a return bus. Dub throws without automation.

What do the knobs do?

Time: Delay time when Time Sync is off. Moving it glides the pitch like a tape speed change; Time Sync: On: the delay time follows the host tempo and the note value chosen with Time Note; Ti…
